

# Electric Cooktop, 75cm

Series 5 | Contemporary

Black Glass

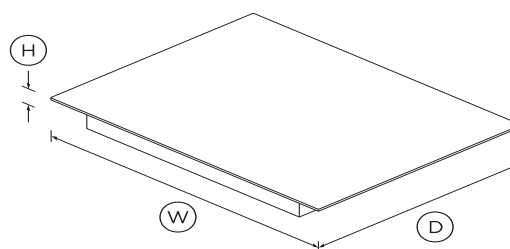

With an easy-to-clean ceramic surface and plenty of room across four heating zones.

- More cooking flexibility with four spacious heating zones of different sizes, including two dual elements.
- Automatic spill detection shuts off elements if pans overflow
- Touch&Slide controls easily control each cook zone

## DIMENSIONS

<b>Height</b>	<b>58 mm</b>
<b>Width</b>	<b>750 mm</b>
<b>Depth</b>	<b>530 mm</b>

## FEATURES & BENEFITS

### Fast response

Fisher & Paykel electric cooktops feature powerful ribbon elements that heat up quickly and maintain an even temperature. AutoHeat mode boosts power and then automatically adjusts to your chosen setting for faster cooking.

### Precise control

The cooktop touch controls are easy to use, responsive and accurate across a range of cooking temperatures – from a rapid boil to a slow simmer. The timer function can be used as a simple

minute minder or to activate any combination of elements.

### Easy cleaning

Fisher & Paykel electric cooktops have a completely flat ceramic glass profile which makes cleaning up a breeze. Cooktop elements automatically shut down when a spill is detected, minimising baked-on grime.

### Safety cut-off

Spill detection technology built into the control panel keeps your home safe – and prevents ruined meals – by automatically shutting off hot elements when pots or pans overflow onto the controls.

### Complementary design

The electric ceramic series is designed to match the rest of Fisher & Paykel's kitchen appliance family, with a stylish frameless design, sleek ceramic glass surface and intuitive controls.

### Sized to suit

Fisher & Paykel electric cooktops come in a range of sizes to suit every kind of kitchen. Because they're perfectly flat and cool down fast, they can be used as an extension of your preparation surface when they're switched off.
